

CWT-PDS-AP-Millsperse 954-R0

## Millsperse™ 954 Corrosion Inhibitor

### Product Description

Millsperse™ 954 corrosion inhibitor is a liquid product designed to protect carbon steel from corrosion in cooling water system. The formulation contains phosphate and zinc, which provide superior corrosion protection.

### Product Application

Recommended feeding method is continuously, as received to a cooling tower basin. The feed equipment should be of plastic construction.

### Benefits

- Provides both anodic and cathodic corrosion control.
- Requires no supplemental corrosion inhibitors even in multi-metal systems.

### Feeding and Dosage

Product dosage depends upon operating conditions and water quality. Your Ashland representative will recommend the proper dosage for your particular application.

### Packaging

This product is available in a variety of packaging sizes. Your Solenis representative will recommend the appropriate packaging for the application.

### Important Information

**Typical Properties** : Refer to MSDS

**Regulatory Information:** Please refer to the MSDS or contact your sales representative for any additional regulatory and environmental information.

**Safety:** Solenis maintains Material Safety Data Sheets on all of its products. Material Safety Data Sheets contain health and safety information for your development of appropriate product handling procedures to protect your employees and customers.

Our Material Safety Data Sheets should be read and understood by all of your supervisory personnel and employees before using Solenis products in your facilities.
